

Need a FREE ClickBank affiliate ID?

Go here:

https://www.clickbank.com/promote_products.html

This message set contains a total of 20 text files - each text file contains 3 separate messages.

That's 60 pre-written messages to promote 20 different ClickBank products - all of which will pay commissions to your ClickBank account.

HOW TO ADD YOUR CLICKBANK ID

Here's an example for DVD Automator (a popular ClickBank product) :

RAW CLICKBANK HOP LINK:

<http://INSERTCBID.dvdauto.hop.clickbank.net>

All you have to do is replace "INSERTCBID" with your ClickBank ID - the Publishers ID is already inserted into the hop link for the ClickBank product being promoted.

So in the example above, if your ClickBank ID is "whodaman" your hop link would look like this:

<http://whodaman.dvdauto.hop.clickbank.net>

CLOAK YOUR CLICKBANK HOP LINKS

We strongly suggest that you CLOAK your hoplinks to prevent commission theft.

If you are an experienced webmaster you can use the Hide HopLink files included with this product to create redirect pages and upload them individually to your webhost server.

If you are NOT EXPERIENCED, we suggest you use one of the FREE online URL cloaking services like:

<http://qwikurl.com>

HOW TO USE HIDE HOP LINKS FILES

PHP SCRIPT:

Open the php script with a text editor like Notepad

Replace the hop link with the hop link you want to cloak.

Upload it to your website and make sure you save it with the extension ".php" – DO NOT save it as ".html" or it will not work.

HTML PAGE:

Open the html file with a text editor like Notepad.

Replace the HOP link with the HOP Link you want to cloak in BOTH places.

NOTE:

Each features the Hop Link is in 2 places. Make sure you replace BOTH with the HOP Link you want to cloak.
